UAS Program Purpose:

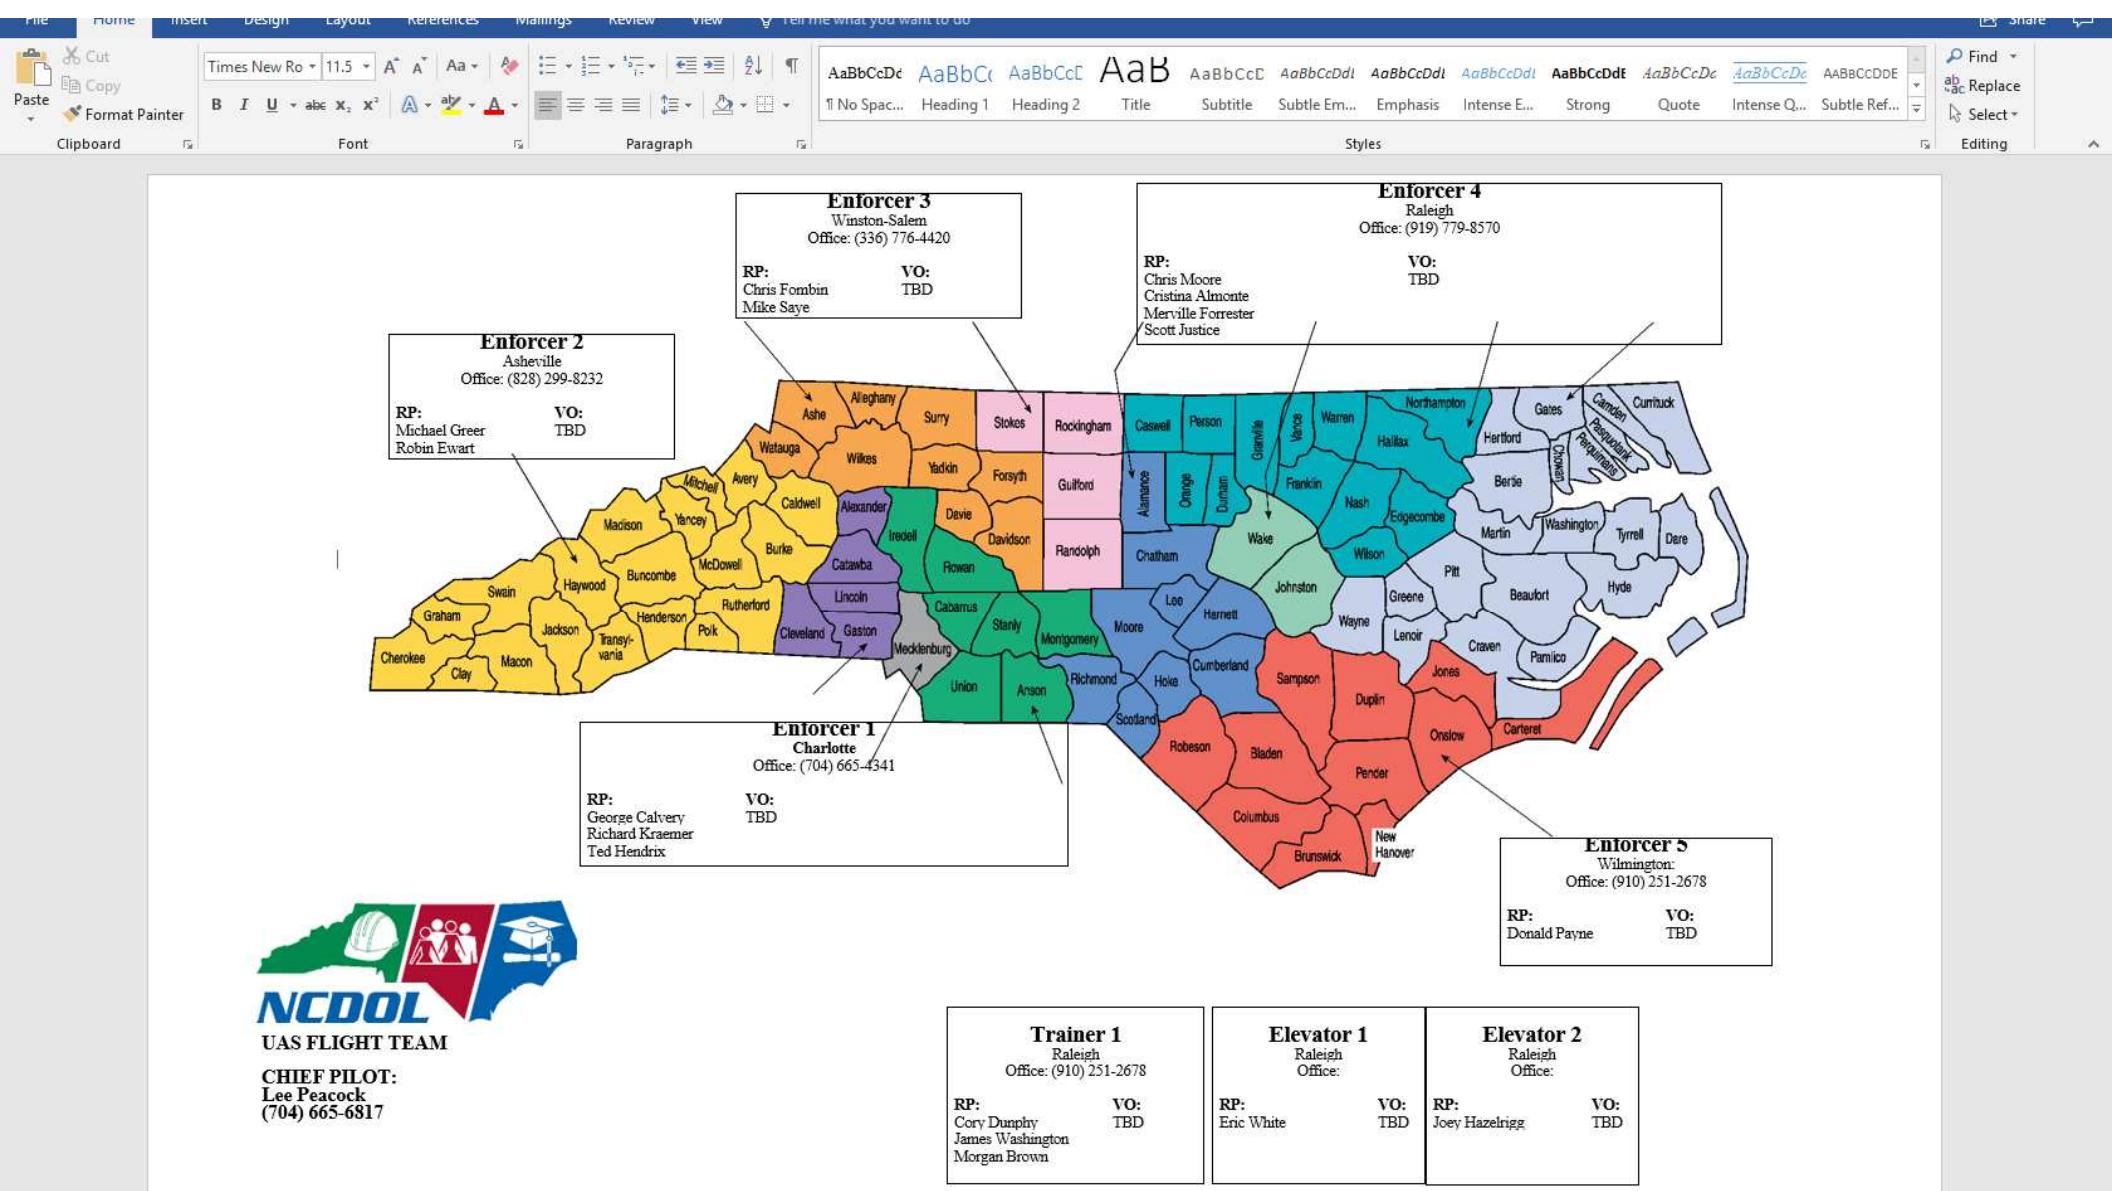

- Enhance our investigative process w/o Staff Exposure
- Build upon core hazard recognition, knowledge and training competencies
- Increase hazard awareness and public outreach opportunities
- Incident Command & ERHS Incidents
- Additional uses with increased flight time

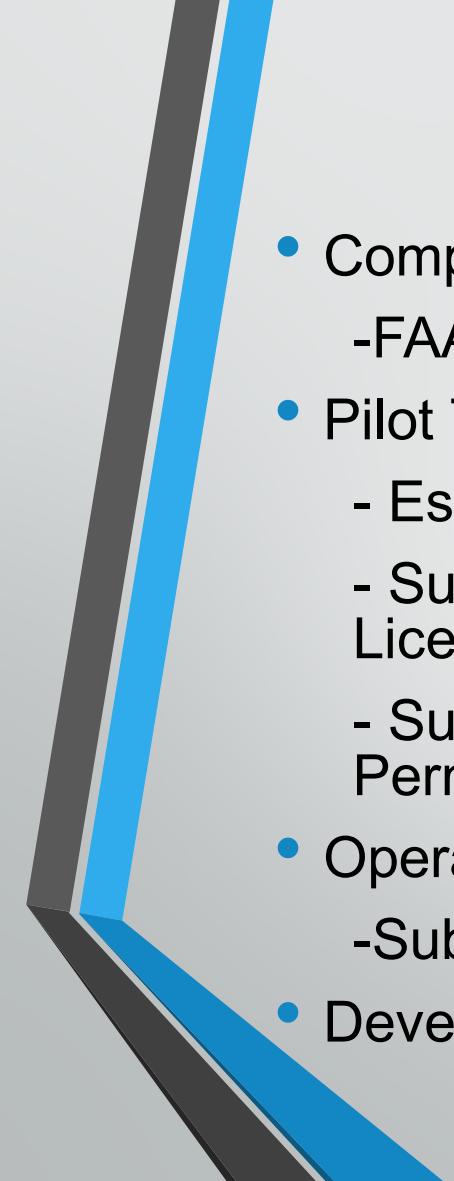

NCDOL UAS Fleet:

- **8 DJI Mavic Pros**
Compliance- 3 West, 2 East
ETTA- 1
Elevator- 2
- **Portable, Foldable, Compact**
- **27 min flight time**
- **Camera- 12 MP ; single shot, burst**
- **Video- 1080, Ultra HD, 4K**
- **Height- 16404 feet**
- **Object Avoidance Sensors**

NCDOL UAS Pilots:

- Team Establishment
 - 2 during flight operations (1 pilot, 1 spotter)
 - Preference to staff with aeronautical background (pilot's license)
 - Tenured staff (\$150 for FAA certification-Biannual)
 - 1 per district or 2 per office (Asheville, Wilmington, ETTA)

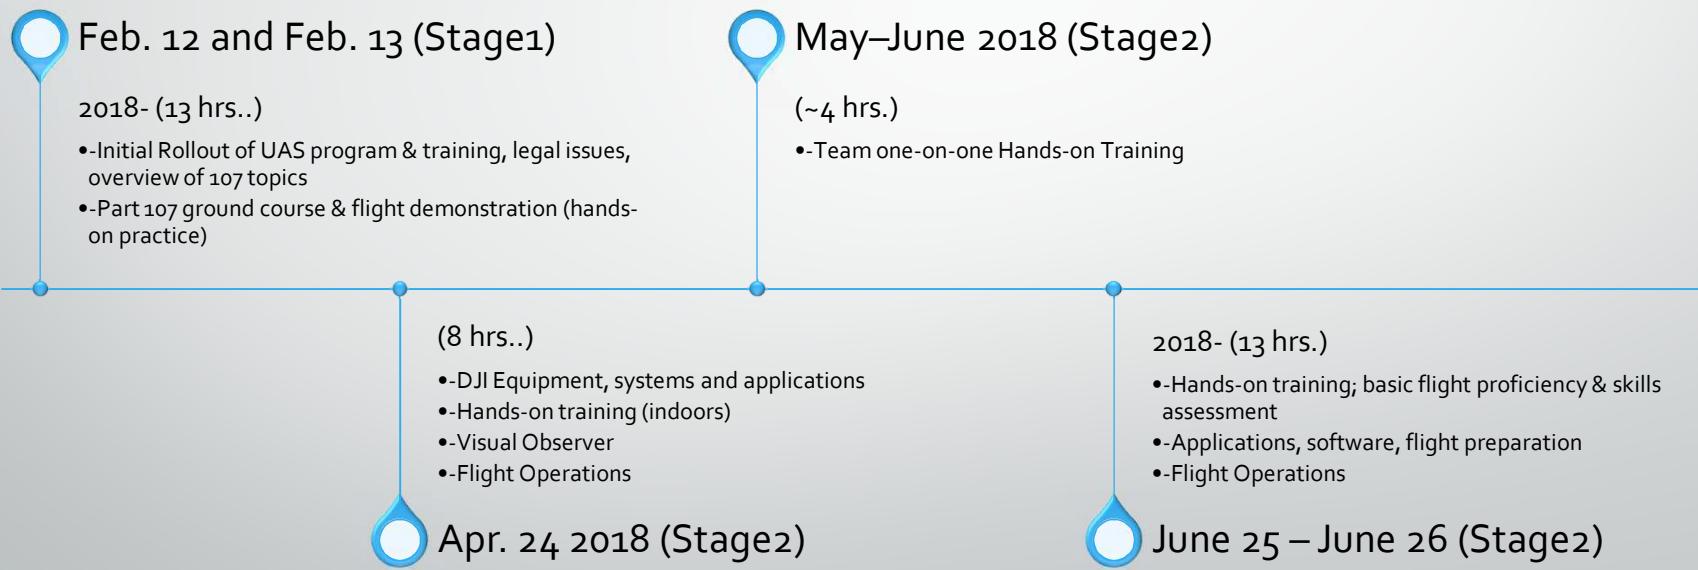

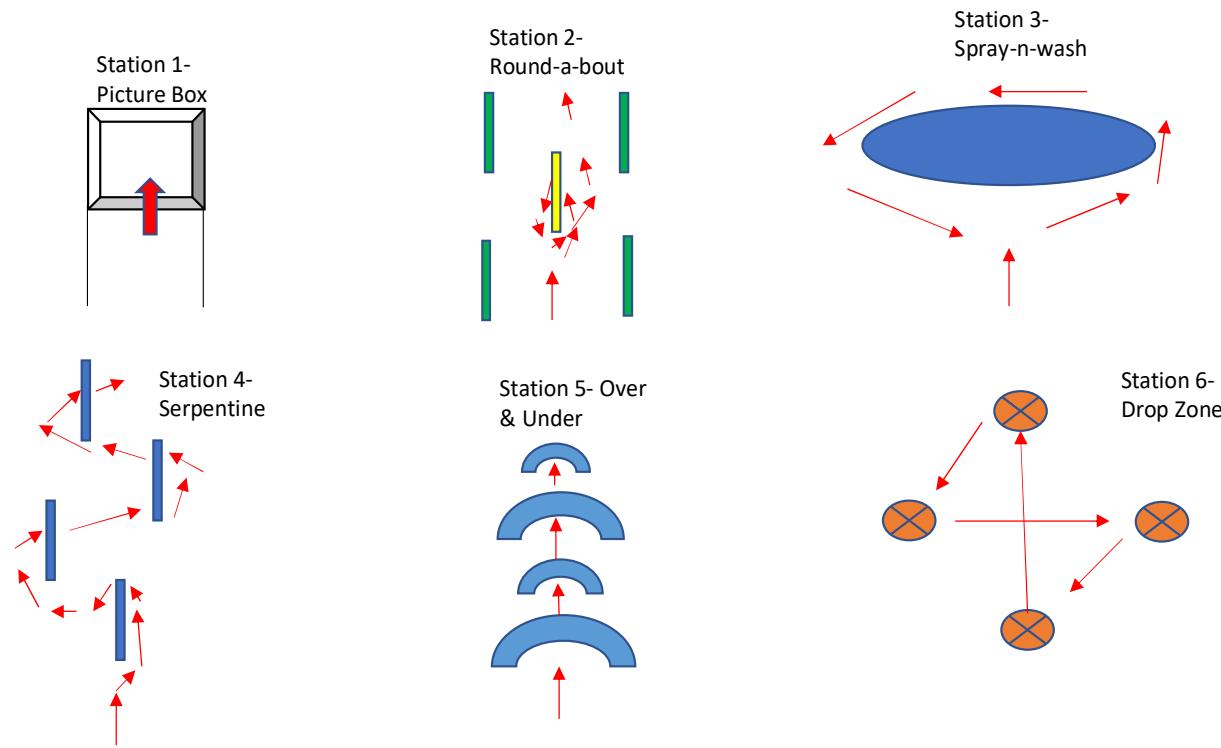

Program Development: Government Operations:

- Compliance with FAA and state regulations
 - FAA Registration
- Pilot Training (Part 107 or under COA if allowed by FAA)
 - Establish training course (initially and biannual requirement)
 - Successful completion and issuance of FAA Operator's License
 - Successful completion and issuance of State Operator's Permit
- Operation in National Airspace (Class G no restrictions)
 - Submission of FAA Waivers (due to 5 NM of Airport)
- Develop SOPs (when to use, who can use, limitations)

Stage 1&2 Training

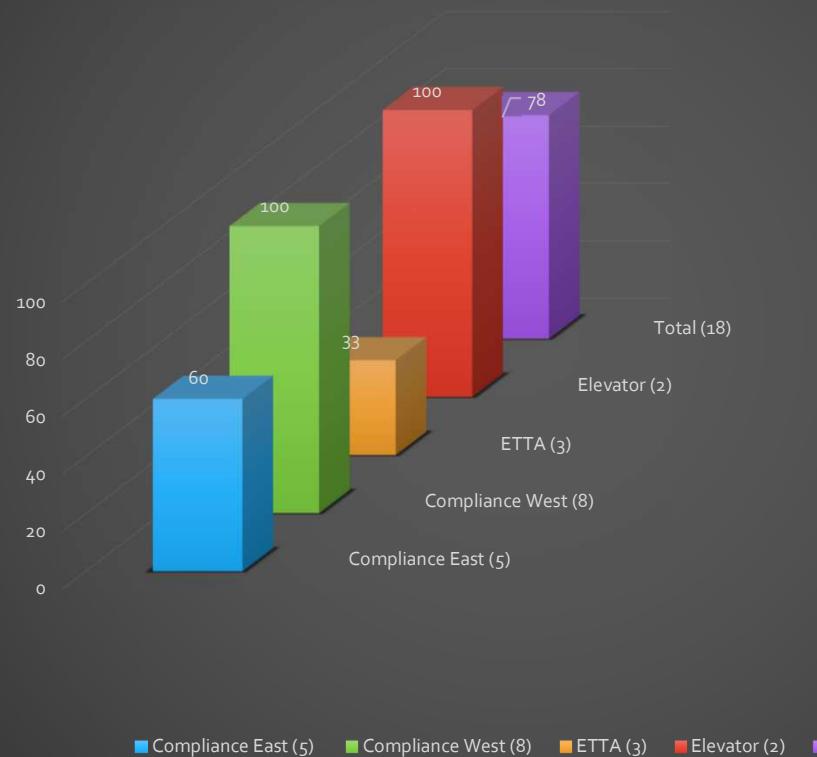

NCDOL-UAS Flight Skills Stations June 2018

Status of Stage 1 & 2 Training: 78% completed

% RP Licensure (Sept 2018)

Implementation Plan and Steps Taken:

The UAS Remote Pilot Training Course will be designed with three main segments:

- Stage 1- basic aeronautical knowledge, federal and state regulations, operating in the National Air Space, meteorology and objectives to pass the FAA Remote Pilot's Examination and NC DOT UAS Knowledge Test.
- Stage 2- 'hands-on' skills and actual operation of the drone. In addition, information specific to the equipment, technology, maintenance, internal standard operating procedures, planning and execution of flight operations will be taught.
- Stage 3- long-term flight proficiency. Upon completing Stage 2, the pilots will be required to conduct independent flights and build flight hours to maintain proficiency and further skills development; will include:
 - *Bimonthly flight hour requirements
 - *First 2 years- quarterly training (including scenario driven missions)
 - *Annual Program Review (internal & external partners)
 - *Enhanced Training
 - *Biannual RP Recertification
