

NORTH CAROLINA DEPARTMENT OF LABOR

No. 54-1

OSH DIVISION

Date: 10/2009

OSHNC INDUSTRIAL DATA REPORT

Pages: 2

Industry: Bakery Products

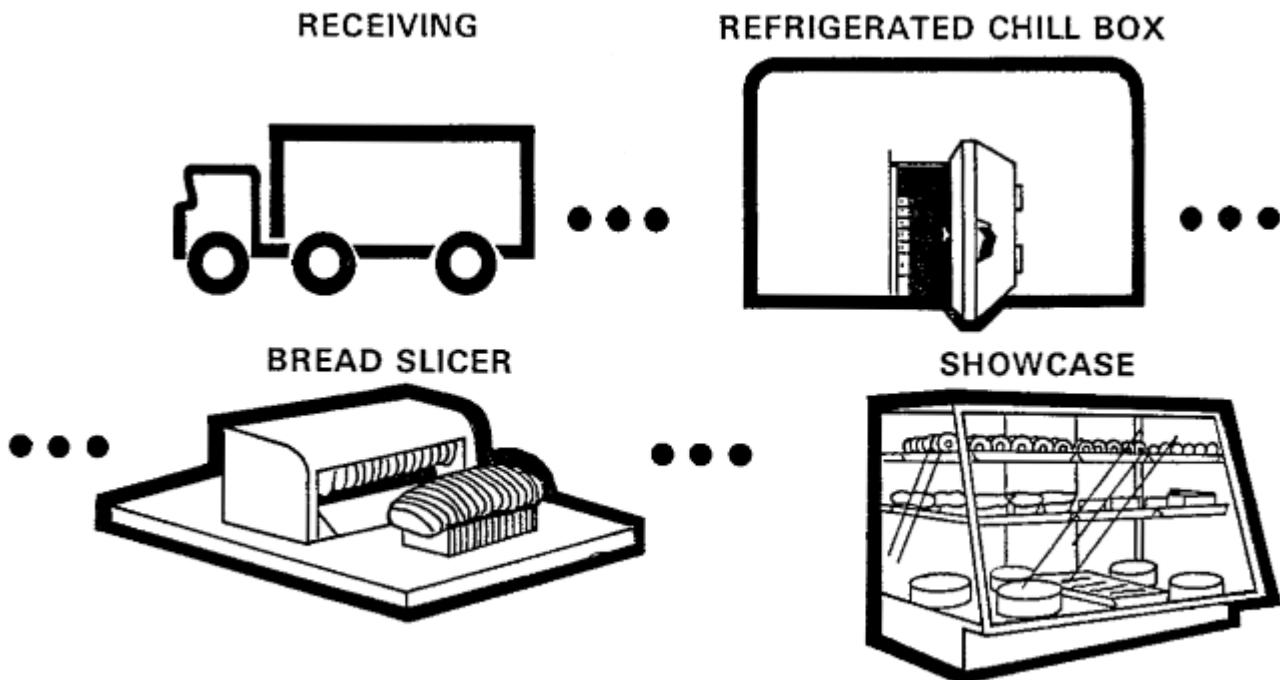

Sub-Group: Retail Bakers, Baking and Selling, Selling Only

SIC: 5461

NAICS: 311811, 445291 and 722213

**PROCESS DESCRIPTION:** The retail bake shop receives breads, rolls, cakes, pies, cookies, tarts, turnovers and other pastries from its own bakery or elsewhere. These items are displayed and/or stored in show cases, store windows, counter tops and refrigerated chill boxes. Powdered sugar may be used to freshen up the appearance of some items. A bread slicing machine may be in use.

#### PROCESS FLOW:

#### Hazards Analysis

Major Hazards			Other Hazards		
Location	Item	Hazard	Location	Item	Hazard
Receiving area	Dockboard	Slipping and tripping	Refrigeration area	Refrigerators	Entrapment, cold stress
	Material handling	Strains and sprains		Floors	Slipping and tripping

Sales counter	Bread slicer	Amputations	Sales floor	Showcases	Cuts from broken glass; strains from bending and lifting					
<b>Key OSHNC Standards</b>										
<b>Reference</b>	<b>29 CFR 1910 — General Industry Standards</b>									
Subpart D	Walking and working surfaces									
Subpart E	Means of egress									
Subpart I	Personal protective equipment									
1910.176	Handling materials									
1910.178	Powered industrial trucks									
<b>Inspection Analysis</b>										
<p>The inspection should begin at the receiving area by checking dockboards for anchoring devices. Floor and aisles must be clean and clear throughout. The two most commonly found pieces of equipment in a retail bakery that must be checked are the air compressor's V-belt drive and the bread slicer for blade guards and an interlock. All machinery and most appliances must be grounded throughout. Show cases must be checked for cracked glass and splintered wood. Also, fire extinguishers must be properly placed, recently examined and operable.</p>
